

Introduction

Nowadays, it is very important to find a good location for the business. This project intends to do that based on the technology.

Business Problem

In this capstone project, we intend to help the client to find the best location for the business.

Methodology

The three points should be kept in mind when looking for the best location:

1. The best location should have fewer competitors.
2. Cluster the location
3. Map the clustered location

Results

There are a few locations are available. The client should choose the best location based on the budget.

Discussion

Based on the analysis, there are a few locations available. The client can choose the location based on the requirement.

Conclusion

A few factors affecting the selection of the location are considered. However, due to the limitation of the data, the project may not reflect the real condition.
